

Visitor's End
Device

On Meeting day and reaching the venue

Start

Visitor reaches the meeting venue. Shows his SMS to the security guard where he is physically frisked. On being declared safe, he enters and reaches the reception desk.

At reception desk, he submits his AADHAR card for manual verification. Also, he clicks on the Visitor button on the screen. A camera opens up. The photo of the visitor is clicked. The photo is sent to FRS and identifies the person.

FRS identification

Identified the person as unknown.

Identified the person correctly with a score of 90%

Manual check then happens.

Verify the details. Identifies the person from 4 sources.

Manual check Result: Not passed. Visitor is sent back.

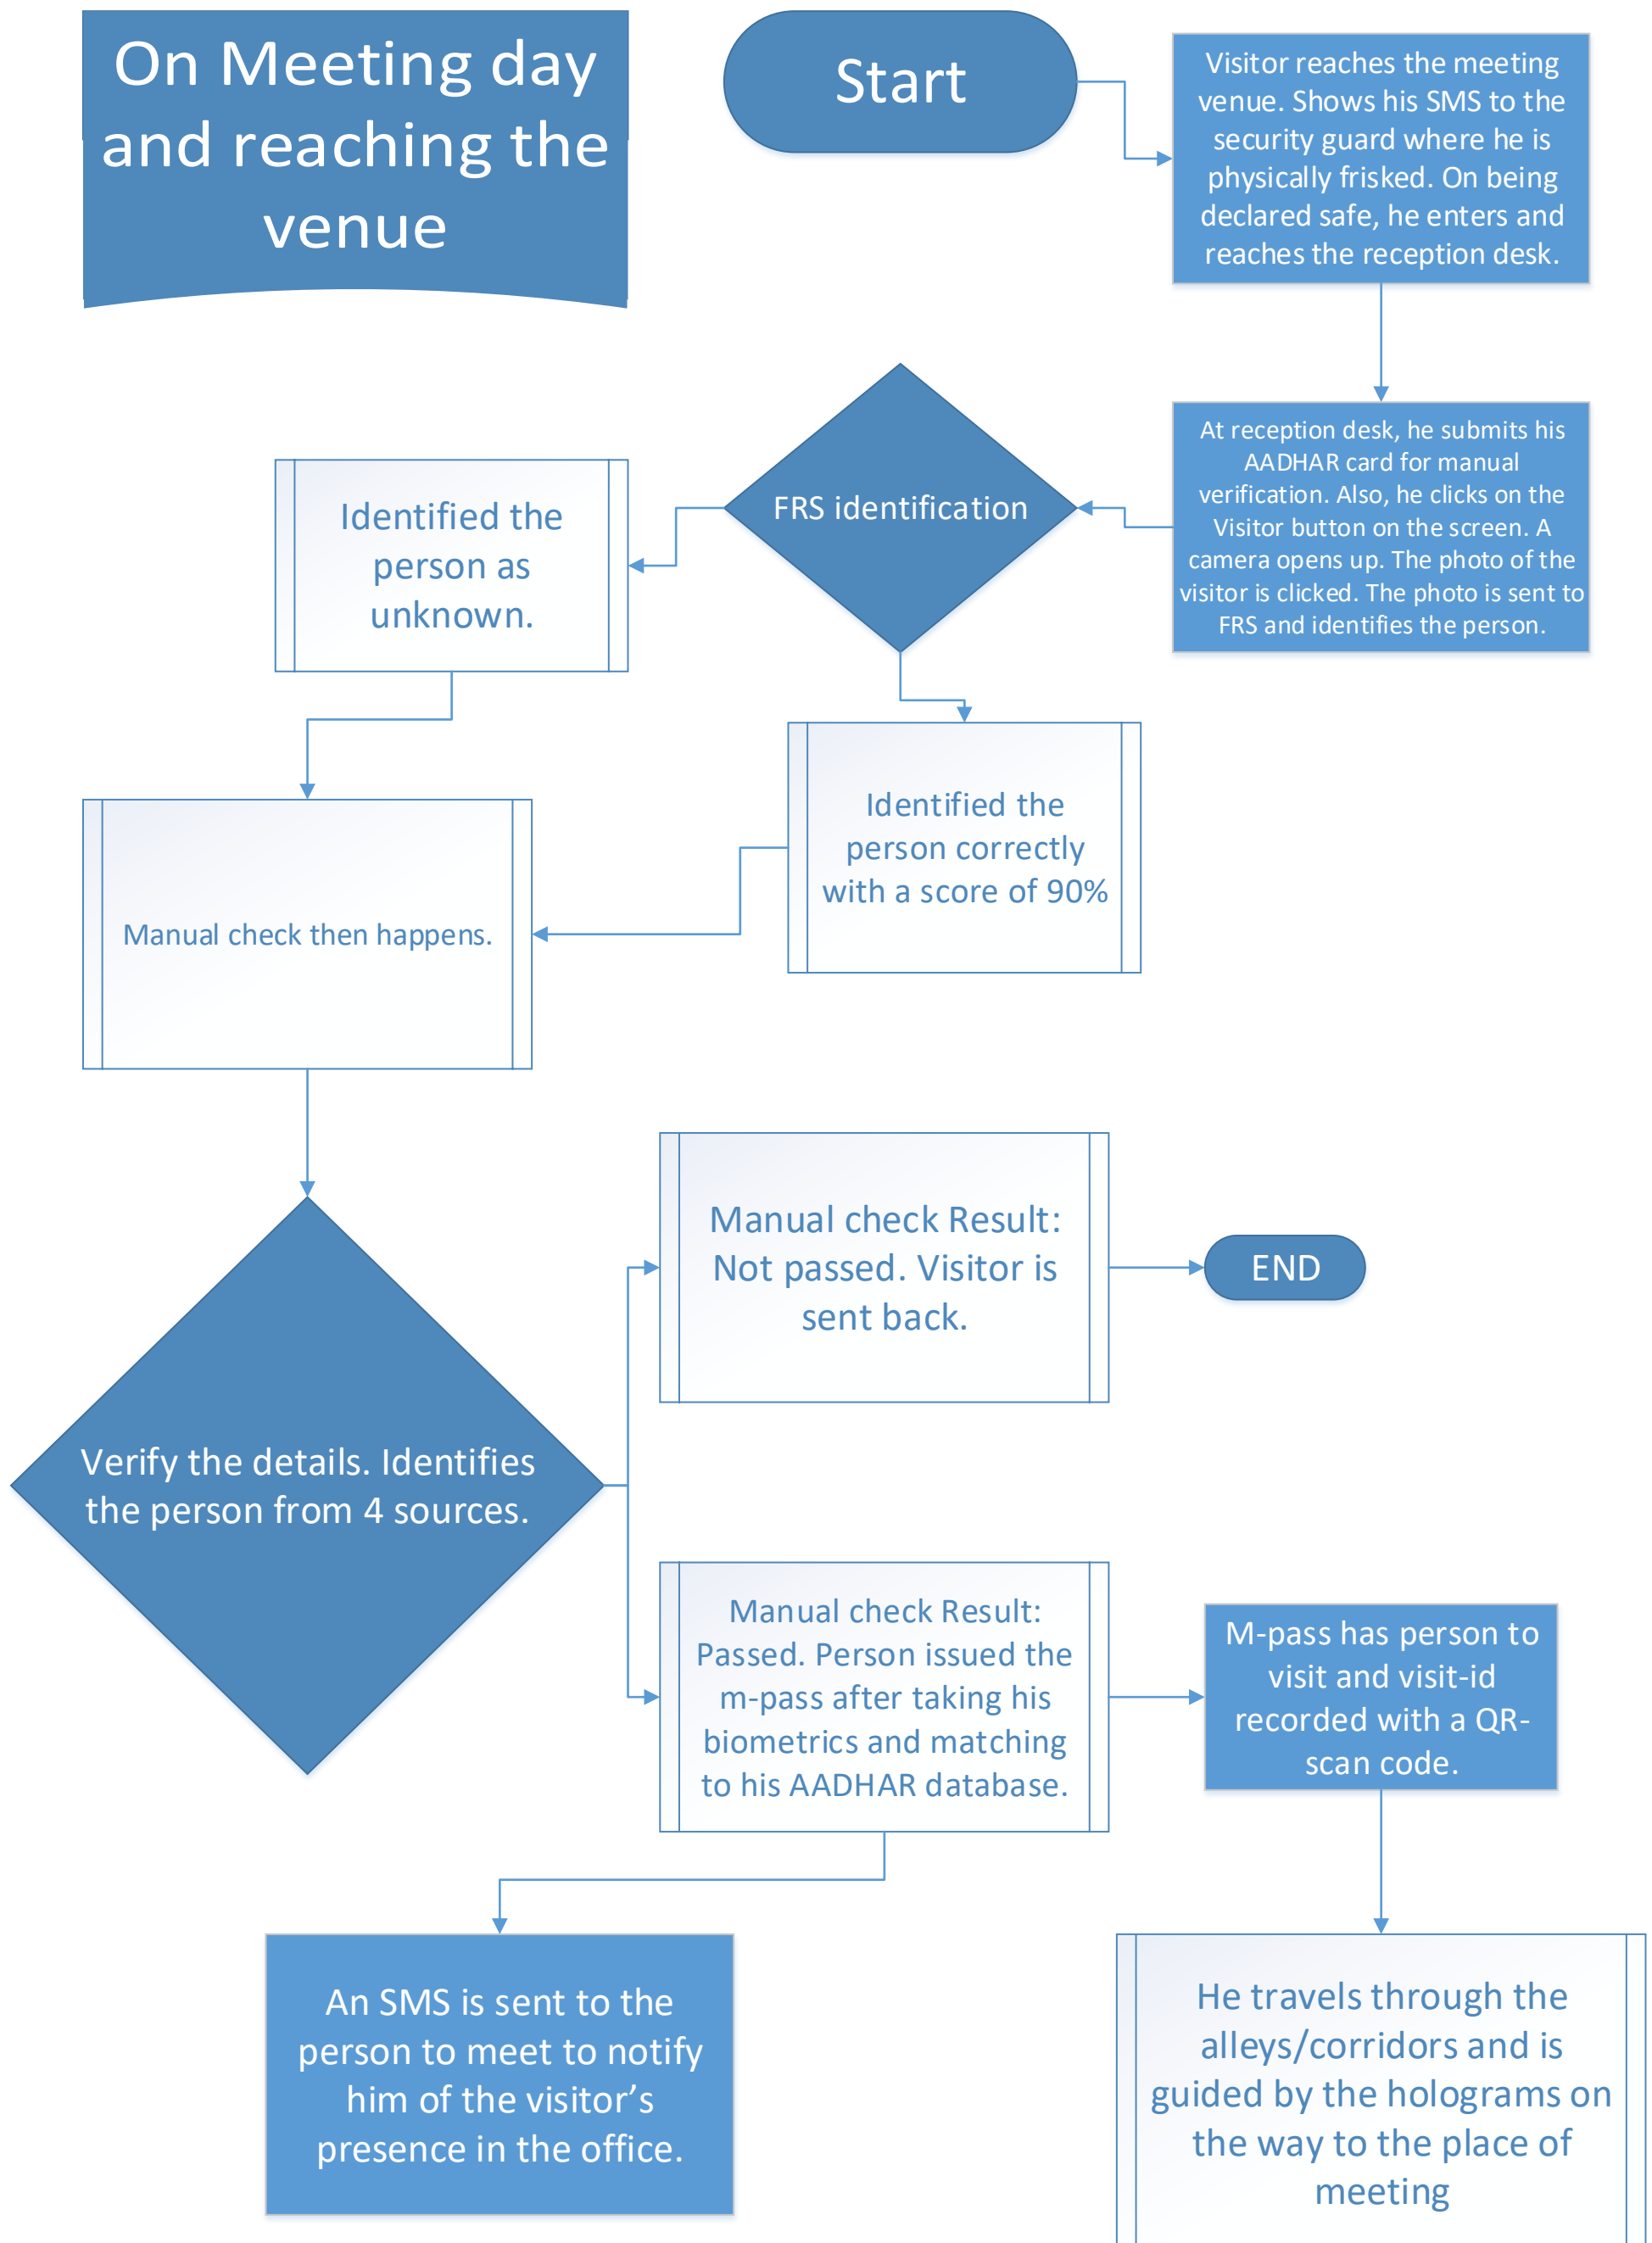

END

Manual check Result: Passed. Person issued the m-pass after taking his biometrics and matching to his AADHAR database.

M-pass has person to visit and visit-id recorded with a QR-scan code.

An SMS is sent to the person to meet to notify him of the visitor's presence in the office.

He travels through the alleys/corridors and is guided by the holograms on the way to the place of meeting

On reaching the concerned person's room

There is a QR scanner there. He shows his m-pass to the scanner and gets accepted verifying that he has met the right person.

QR result: Denied.

Met the wrong person

Met the right person.

Meeting begins

Meeting ends on stipulated time

Meeting gets extended

The employee increases the TTL of the QR code

The employee raises his ID card to perform a visual login into the visitor portal. Lets the visitor scan the QR code here to notify that he is leaving.

Visitor leaves the room. Knows the route to gate or is helped by the Holograms on the way. Get triggered by saying 'EXIT' voice input

He is on reception desk. Sees the exit panel. Clicks on it. Says exit. His exit is marked at receptoin. Collects his AADHAR card. which he surrendered initially.

Visitor exits

EXIT
